(解答例1) I will make sure that each student has time to reflect on their learning. This is because reflection helps them understand what was good for their learning and what they need to improve. By looking back, they can find their strengths and weaknesses. Then, they can adjust their learning plans and try again. This process will give them opportunities to improve the quality of their learning and grow as independent learners.

(71 words)

(解答例2) I believe it is effective for students to discuss the strengths and areas for improvement of each other's sentences in pairs. I will also provide model sentences and give students the opportunity to compare their own sentences with the models. This is because I think that through these processes, students will realize how to express their ideas more effectively and develop a better understanding of their learning.
